

2027 Benchmark Policy

BACKGROUND

The Rowing SA State Team Selection Policy outlines the broad selection criteria for all rowers and coxswains and can be viewed on the [Rowing SA website](#). This document operates as a supporting policy to the Selection Policy and states the minimum expected benchmarks for each crew in the Interstate Regatta. Benchmarks are not provided for Masters Participants however as a guide selected crews should have the potential to achieve 5th place or better.

PROCESS

Rowing SA acknowledges the State Team is in a growth and development phase and therefore has made adjusted benchmarks for the Interstate Crews. The table below states the minimum expected times for any crew to be selected.

Please note the following:

- Benchmark times are a guide for a selected crew's potential to achieve 5th place or better. This is the minimum expectation to be sent to the Australian Rowing Championships. If the crew does not meet the minimum benchmark, the Selectors may recommend, and the Board may approve, sending a development crew. Any such recommendation must set out the development rationale and be communicated to the affected Athletes.
- A 1% allowance has been applied to account for the "slower" West Lakes water.
- Benchmark speed order trial is to be conducted in still conditions or with a tail breeze over 1500m.
- This benchmark will be reviewed each year and change depending on results at the Australian Rowing Championships.
- This benchmark provides accountability and standards to both selected crews and Coaches.
- PR1X events (MPR1X and WPR1X) are based on the fastest time due to lack of results. This will be considered when applying this benchmark. All other crews are based off the 3rd fastest time.
- 2027 benchmarks are based on results from the previous Australian Rowing Championships.
